```

Uh, maybe you could subscript your arrays. :-)

```
oLegend = Obj_New('IDLgrLegend' , $
                  Item_Name = nameList[0:1], $
                  Item_Obj = objList[0:1], $
                  /Recompute )
```

Cheers,

David
