Hi everyone,

I have created a legend which include many items, how can I simpkify this legend? I mean to make this big legend into some small legends. Thank you for any tips.

my code is like this:

```
....  
nameList = ['a', 'b', 'c']  
objList = [symbol_1, symbol_2, symbol_3]  
  
oLegend = Obj_New('IDLgrLegend' , $  
                  Item_Name = nameList, $  
                  Item_Obj = objList, $  
                  /Recompute )  
  
....
```

Cheers.
