All:

I just wanted to acknowledge you all. Last night I too ran into the
idl crash problem "bus error" problem when invoking tv or tvscl in idl
6.4 with set_plot,'x' also invoked. Changing to set_plot,'ps' or 'z'
did not cause tv to make idl crash. Invoking atv or iplot also caused
the "bus error". I was using an Xterm. I note also that the
idlde.app and IDLDemos.app also crashed (without saying why).

The above update to X11 described by Raul fixed the problem.

Many thanks...

:Stephan
plot continued to function.
