Subject: PSYM=10 + POLYFILL = ?

hello there,

many times i like to show x-y plots with PSYM=10, i.e. histogram-like
mode. now i have three sets of data to plot together and i want to
distinguish one from another with different fillings (cannot
distinguish using colors, printing issues).

I though about using plot + polyfill, but then polyfill won't respect
the PSYM=10 mode, and the result is not quite what i want. how can i
have a "PLOT, PSYM=10"-like graph with pattern filling???

thanks for any advice,
paula
