Subject: Why did IDL just start crashing Posted by Dave L on Wed, 25 Feb 2009 22:53:46 GMT

Hi,

I'm running IDL 7.0 on Windows XP with 3gb ram. I've had no problems for the 5 months I've been using IDL on this computer, then today idlde.exe crashed while I was just writing some code. Now it just starts up and crashes immediately. I've reinstalled IDL and it's still crashing.

Anyone have some idea of what's happening?
