I was nervous because was friday (I hate unfinished things on this day, lol) and if you copy "qlinear0" or "hist_quickie" and paste it in IDL or ENVI tutorial you'll find...nothing.

My problem is, I have a huge big image and cannot use leefilt because it uses an array as input.

Because I know we can do it by ENVI menu, I think we can do it by program lines...

I'll check "ADAPT_FILT_DOIT"

Thanks for your time :)
