Ah, yes. Well, about half the map projection tips on my
web site are concerned with just this problem. :-)

I'd start with these:

http://www.dfanning.com/map_tips/precipmap.html
http://www.dfanning.com/map_tips/tiffoverlay.html
http://www.dfanning.com/map_tips/modis_overlay.html

I've even resorted, lately, to putting pictures of sexy
women in the articles to entice people to read them. ;-)

Cheers,

David
