
Subject: passing parameter from IDL to Java

Hi,
I am new to IDL-Java Bridge. I was wondering whether there is a way to set the variables in Java from IDL. For example., setNum(number) from an IDL program to a Java program which implements the function setNum().

Something like below....

NumGetset.java

```
public class NumGetset {  
    public int num1,num2;  
    public void setNum(int num1, int num2)  
    {  
        this.num1 = num1;  
        this.num2 = num2;  
    }  
    public int getNum1()  
    {  
        return this.num1;  
    }  
    public int getNum2()  
    {  
        return this.num2;  
    }  
}
```

pro NumGetsetDemo

```
jo = OBJ_NEW('IDLJavaObject$NUMGETSET', 'NumGetset')
```

```
;How to set the variables here? Is it possible to do that?  
;setNum(100,200)
```

```
print, 'Num1 = ', jo -> getNum1()  
print, 'Num2 = ', jo -> getNum2()  
OBJ_DESTROY, jo
```

```
end
```
