Subject: Re: Function Makes Unexpected Appearance

Hmm,

so I think I must still need one of these sleepy epiphanies.

I tried reading the documentation and while I understand each word in
he documentation I don't understand the sentences. But when David
says something is worthwhile it is in one's best interest to
understand even if I will never use it. Does anyone have an example
of this showing its usefulness and an explanation of what you would
have had to do otherwise?

Cheers,

Brian
