Hi Russ,

The link to the workbench directory on my site only works from IDL7.0. I am in the process of updating my Kilvarock web site and will have the new dll/dlm when it is up. In the meantime you can use the "old" one at <http://www.kilvarock.com/freesoftware/dlms/avi63plus.htm>. It doesn't have as much error handling as the new one but still works fine.

Thanks,  
Ronn Kling
