Subject: Italic and upright in the same title/caption

Hi,

is it possible to persuade IDL to use both italic and upright text in
the same caption (e.g. italic for variable names, upright for units)?
I would like to do this with Postscript output using the Times font.
At the moment I'm creating the strings for my captions using TeXToIDL
because they include subscripts and greek symbols, so bonus points for
any suggestions that allow me to continue to use that!
