Subject: how I can give an own icon-bitmap to an idl-application?

Posted by rew032 on Wed, 24 Jul 1996 07:00:00 GMT

Hello!

How can I give an user-created icon-bitmap to an idl-application, which opens
its own window (the icon which appears, if I iconify the window).
I tried it in the Idl-file for the app-manager in the same way, in which
I give a special background for the application windwow (this works), but
no success.

Has anybody help?

Thanx and regards, Astrid Kuhr
