What kind of errors do you get? ... Of course, you would have reformed the code... for example

```
img = 0.3*Reform(img[0,*,*]) + 0.59*Reform(img[1,*,*]) +
0.11*Reform(img[0,*,*])
```

can not work. Either write it on 1 line, or put a \$ sign after the last + on the first line..

Jean
