 I used to use a routine called pwidget (with idl 3.6) that would let
> you interactive plot a vector and change limits, plotting sybols,
> titles, etc. With 4.0 this seems to be gone. Is there a new routine
 that will let me do this?

In my IDL distribution the file in question is
in idl_4/lib/obsolete/pwidget.pro.
Robert M. Moss, Ph.D. - mossrm@texaco.com - FAX (713)954-6911
