If you don't have handy that ORD function Jeremy pointed out (I didn't
> know of it), and assuming your array is of byte type, you can do the
> following:
> input = [[1,10,9,100,200],[2,11,8,101,201],[2,11,8,101,201],$
```

```
[3,10,9,100,200],[4,7,12,99,199],[2,11,8,101,201]]
>
>
> keep = Where(Histogram(1000L*input[1,*]+input[2,*], rev=r) GT 0)
> keep = r[r[keep]]
 print, input[*,keep[sort(keep)]]
       1
            10
                  9
                       100
                             200
                             201
      2
                  8
           11
                       101
>
            7
                       99
                             199
      4
                 12

Hi Guillermo,
```

Thanks for your kind suggestion! Have a nice weekend!

Во
