no. (per IDL)

yes. (per current computers and OSes)

I struggled with it quite a bit, and there is nothing
like a 64 bit OS with 16gb of ram to suddenly turn
the "unable to allocate memory" problem get filed
with "what if I am on dialup and call waiting comes in".

cheers,
bob

PS in fairness, i think it is a OS problem, not an IDL
problem, in most cases.
