Although the picture shows a pliers, you only receive the tips. Grammarians and lawyers may parse the written description to try to determine whether or not it implies the pliers comes with the set. I was misled, and was not offered free shipping on the return.

Even after my complaint, Amazon has not changed the display ad. I made it clear to the complaint department that the display should be changed. But it is still popping up with the same misleading picture. I bought another SK retaining ring pliers from Amazon which works very well. The old tips are sitting in my tool drawer waiting for a use. The copper ones might make nice antennae for a robot doll.

Despite the product description, this product **\*\*doesn't include any pliers\*\***, it's just the tips. That's why it's so cheap. That's presumably also why the product is called "SK 7648 16 Piece Retaining Ring Plier Tips Set". Amazon gave me a full refund and said they'd change the description, but that was a couple weeks ago.
