The wrist will look a little bit dark after a few months... :(
but the watch is beautifull!

Cool color steps up the game. Chronograph watch features red resin strap and polished stainless steel case. Black dial with date window, three subdials and silvertone accents. Three hands.

Quartz chronograph movement. Water resistant to 100 meters.

Get cool functions without compromising hot looks with this polished yet casual chronograph watch from Nautica. A comfortable, flexible resin band joins a round, polished stainless steel case to create a masculine, slightly nautical appeal. A rich, black dial displays a mix of white Arabic numeral indicators and minute markers as well as three stopwatch subdials subtly accented by red markings. Arabic numeral minute indicators in increments of two and sophisticated, luminescent hands add to the easy-to-read quality of this analog watch. Additional functions include a discreet date window at the four o'clock position and a tachymeter.
