Hello folks,

I want to display a CONTEXT MENU (pop-up or shortcut menu) with a WIDGET_TEXT or CW_FIELD. I don't know if it's possible because, right now, when I try to add a text component, the IDL gives me the following message: Parent is of incorrect type.

```
base=WIDGET_BASE(parent,/COLUMN,/FRAME,/CONTEXT_MENU)
option_1=CW_PDMENU(base,['0\ option 1'],/CONTEXT_MENU)
```

```
;; here is where I've the problem -----
```

```
option_text=WIDGET_TEXT(base,VALUE='text')
```

```
;;
```

```
-----
```

```
WIDGET_DISPLAYCONTEXTMENU, event.id, event.x, event.y, base
```

Is there a correct way to add a text field in a CONTEXT MENU ? If not how can I do something similar?

Thanks in advance,

natha
