Subject: Problems with the AVI reader from Ronn Kling
Posted by thierrysavin on Wed, 27 May 2009 23:50:12 GMT

Hello,

I have IDL 7.1 and wants to read an avi movie file. I just installed
Ronn Kling's DLM following
the steps described in his presentation.
The following command crashes+quits IDL:

IDL> oAVI = OBJ_NEW('KRSgrAVIreader',FileName)
IDL> im = oAVI->GetFrame(1)
IDL> OBJ_DESTROY, oAVI

But the following works:

IDL> oAVI = OBJ_NEW('KRSgrAVIreader',FileName)
IDL> im = oAVI->GetFrame(1) & im = REFORM(im)
IDL> OBJ_DESTROY, oAVI

Also, I have to quit IDL if I want to erase the movie file I just
accessed
with the reader (otherwise Windows complains the file is in use by
another
program).
Are these normal behaviors?

Thank you for your help,

-Thierry
