Subject: ? - Putting text on TV output
Posted by Michael Ochs on Tue, 30 Jul 1996 07:00:00 GMT

I am displaying a series of grey scale images, rotating through them
using the tv command. I would like to place the number of the image
displayed next to the greyscale image so that I know how far through
the series I am. Is this possible and if so, can anyone point me in
the right direction?
