BTW, the GCTP parameter list can be hard to find itself.
I've never seen it in any IDL documentation. Rather, I
go down the hall and take a binder off the shelf of the
resident map expert. It is in Table 6.5.4, Projection
Parameters in the HDF-EOS Library User's Guide for the
ECS Project, Volume 1: Overview and Examples, published
June 1999.

You can probably find the information elsewhere, too,
I just don't know where. :-)

Cheers,

David
