Subject: Re: How to get windows id or title by clicking on it
Posted by Jeanphi62 on Fri, 19 Jun 2009 03:56:51 GMT

With

```
tlb = widget_base(title="mywindow", MBAR=mbar, /col, $
        event_pro='test_function')
```

and

```
pro test_function, event
print, "hello"
end
```

There is no "hello" printed when I click on the widget_base...
