Subject: problem with shade_volume

Posted by Jorn Helbert on Mon, 29 Jul 1996 07:00:00 GMT

I have a problem with SHADE_VOLUME. I have a 3-D array with logarithmic
densities, i.e. in the range form -2.5 to -1.1. There are definitve
isosurfaces in the data as I can see when I look at slices. But put in
the data in shade_volume always reports 'no surfaces'. It happens also
when I use the SLICER, it simple crashes, because it can't find
sufraces, also I selected a treshold where there are iso-surfaces.
