Subject: Re: IDL 7.1.1 Workbench update for Macintosh OS X
Posted by Arne on Sat, 27 Jun 2009 22:59:56 GMT

I can't log in on http://www.ittvis.com/ , apparently the website/
server is having some problems.
Please fix this, I need the updated Workbench, since Im using 7.1 now
and it is giving me problems, and Im working on a project with a
nearing deadline and the issues of 7.1 are annoying.
