Simple enough. Use CATCH. If ENVI is NOT install, the CATCH will "catch" the error.

```
;++  
;  
;  
; @examples  
; <PRE>  
; IDL> PRINT, ' ENVI is ', ( Simple_ENVI_On() ) ? 'Available' : 'Not  
Available'  
; </PRE>  
;  
;-----  
FUNCTION Simple_ENVI_ON  
  
CATCH, ERROR_STATUS  
IF Error_status NE 0 THEN BEGIN  
  PRINT, 'Error index: ', Error_status  
  PRINT, 'Error message: ', !ERROR_STATE.MSG  
  CATCH, /CANCEL  
  RETURN, 0  
ENDIF  
  
ENVI, /Restore_Base_Save_Files  
  
RETURN, 1  
END
```
