Subject: Extended dilaog_pickfile
Posted by Ian Dean on Mon, 22 Jun 2009 08:17:28 GMT

Hi,

   Is there a better method of file selection than dialog_pickfile? Because
I have a number of similar named files (some even have the same name in
multiple directories) and an idea of creation date would be VERY helpfui. A
sort on date and/or filename would also be a nice to have. i.e. I'm looking
for something like windows explorer (on windoze obviously) or file manager
(under X-windows).

   Unfortunately because of the X-windows, I'm limited to version 5.4.

Any help would be most welcome.

Regards,
   Ian
