Subject: font size in help window? Posted by Matt[2] on Fri, 24 Jul 2009 14:23:44 GMT

Folks,

I'm starting to use idI7+ under idlwave/emacs and the new help browser is a part of the eclipse workbench. I have started the idlde and tried to change the preferences under window->preferences, but I can't find the font that makes the help window font large enough to read.

Does anyone have any tips?

Thanks Matt
