Subject: Integer - decimal help
Posted by   on Tue, 25 Aug 2009 09:14:31 GMT

Hi there,

I don't know how to read the integer and decimal parts of a number
separately . For example:

I have a number: x=34.75

I would like to read the integer part and decimal part separately:
a=34, b=75(or .75)

Can you please explain me how to do this?
