
Subject: idl routines callable from c-programs

Hello, is it possible to make an IDL program that is callable from a C-program, and for example performs the following:

1. Restores an object containing some data from a save-file
2. Reads in some additional data from a ncdf file
3. Apply some object methods on the ncdf data

Is it possible to call IDL object methods directly in a C-program?

Regards, Hjalti
