Subject: idl routines callable from c-programs
Posted by hjalti on Tue, 08 Sep 2009 14:17:48 GMT

Hello, is it possible to make an IDL program that is callable from a C-
program, and for example performs the following:
1. Restores an object containing some data from a save-file
2. Reads in some additional data from a ncfd file
3. Apply some object methods on the ncdf data

Is it possible to call IDL object methods directly in a C-program?

Regards, Hjalti
