
Subject: min_curve_surf error?

I've been looking at "min_curve_surf" in the IDL /lib directory. On lines 264-265, there is the following:

```
; For min_curve_surf, divide c(3:*) by 2 cause we use d^2 rather than d.  
if keyword_set(tps) eq 0 then c(3) = c(3:*)/2.0  
      ^^^^
```

It seems to me that "c(3)" should be "c(3:*)", according to the comment. Has anybody noticed this?

Kevin
