Subject: Change in reading DICOM files in 7.1 Posted by Mike Chinander on Mon, 21 Sep 2009 16:14:46 GMT View Forum Message <> Reply to Message

Has anyone else had problems reading DICOM files in 7.1 using read\_dicom() that worked fine in previous versions? It looks like ITTVis added a check to see if the file being read had a DICOM preamble, but it seems like it handles preamble-less DICOM files just fine by creating the IDLffDICOM object and using the Read method.

Thanks,
