Subject: HDF_EOS: writing attributes to a file

Hello together,

I have read attributes from an HDF_EOS file by using EOS_SW_ATTRINFO
and
EOS_SW_READATTR. In the array of attribute names I get the names where
I get the info from to which swath they belong to. Now I have
generated a new file with the same EOS swath structure and the same
data fields. Unfortunately I am not able to add the attributes to the
new file by using EOS_SW_WRITEATTR. From my understanding using the
information from EOS_SW_ATTRINFO and EOS_SW_READATTR when calling
EOS_SW_WRITEATTR should allow for a copy of this attributes to the new
file ? Or how do I link the attributes to the respective swaths and
data fields ?

Thanks for your help in advance !

Klemens
