Hi, Ronn

Sorry for getting back to this post so late. I tried to get the latest version of your dlm both from workbench and from your website. I still got the same error msg. In order to see the msgs, I finally tried once on my colleague's laptop which is a pure english locale vista, and I saw this,

```
IDL> DLM_REGISTER, 'C:\Program Files\ITT\IDL70\bin
\bin.x86\KRSgRAVI.dlm'
IDL> DLM_LOAD, 'KRSGRAVI'
% DLM_LOAD: Error loading sharable executable.
      Symbol: IDL_Load, File = C:\Program Files\ITT\IDL70\bin
\bin.x86\KRSgRAVI.dll
      The application has failed to start because its side-by-
side configuration is incorrect. Please see
      the application event log for more detail.
% Execution halted at: $MAIN$
```

I guess that is what I was having on my computer since we have the same installation of idl 7.0.3.

Thanks for your help!

Best,
Eugene
