Ok, just for grins I uninstalled and reinstalled the plug in once
more. I did not modify anything. When I try and run fastAVIdisplay.pro
I get this error:
```

% OBJ_NEW: Error loading sharable executable. Symbol: IDL Load, File = C:\3rd

Party\ITT\IDL708\idlde\plugins

```
\com.rlkling.idl.contrib.avi.windows_2.0
      .0\KRSgrAVI.dll
      This application has failed to start because the
application
      configuration is incorrect. Reinstalling the application
may fix this
      problem.
% Execution halted at: FASTAVIDISPLAY
                                             26 C:\3rd
 Party\ITT\IDL708\idlde\plugins
\com.rlkling.idl.contrib.avi.windows_2.0.0\fastAV
 Idisplay.pro
```

Sigh.
