Ok, just for grins I uninstalled and reinstalled the plug in once more. I did not modify anything. When I try and run fastAVIdisplay.pro I get this error:

```
% OBJ_NEW: Error loading sharable executable.  
      Symbol: IDL_Load, File = C:\3rd  
      Party\ITT\IDL708\idlde\plugins
```

\com.rlkling.idl.contrib.avi.windows_2.0

.0\KRSgrAVI.dll

This application has failed to start because the application configuration is incorrect. Reinstalling the application may fix this problem.

% Execution halted at: FASTAVIDISPLAY 26 C:\3rd

Party\ITT\IDL708\idlde\plugins

\com.rlkling.idl.contrib.avi.windows_2.0.0\fastAV
Idisplay.pro

Sigh.
