Subject: Theie is a small problem about HISTOPLOT in Coyote's libraries

Posted by duxiyu@gmail.com on Fri, 16 Oct 2009 13:18:00 GMT

Hi, erveryone.

On IDL 7.1.1 under Windows, there seems to be a small problem about
the procedure HISTOPLOT.

For example,
   Histoplot, Dist(256), xrange=[0, 187]
   Histoplot, Dist(256), xrange=[0, 188]

The figures are both wrong and very different.
I don't know why these errors happen.

Best regards,
jdu
