Hallo,

I want to display one ployigon or the line on the image in envi display, how can i do it?

i can already display a polygon on the envi but no on the envi image. on the envi display, i do this:

```
envi_open_file, filename
```

```
xpt = [1,2,2,1,1]
```

```
ypt = [1,1,2,2,1]
```

```
dn = envi_get_display_numbers()
```

```
if (dn[0] eq -1) then return
```

```
envi_display_query, dn[0], W1=w1
```

```
wset, w1[0]
```

```
plots, xpt, ypt, /device
```

can somebody help me?

thanks in advance

Woods
