Folks
I want to read some data with *.dat format with unknown number of
columns and rows. I tried to read with*DDREAD.pro* but it does not
work. Data for each file is like this:

260.559844971 4.000000000 0.390625000   0.460937500 ……..
260.559844971 4.000000000 0.382812500 0.318359375……..
260.559844971 4.000000000 0.414062500 0.439453125 ……..
……
…..
…..
Actually I don't know the number of rows and columns (but definitely
number of rows is less than columns). Does anyone have experience to
how read this kind of files?
Any help highly will be appreciated.
Cheers
