Hi all,

The routine 'legend' is not working with the function 'symcat' for the following test program.

```
;;;;;;=====
pro legend_test

set_plot,'win'

window,0,xs=600,ys=500

n=12
xx=findgen(200)
for i=0,n-1 do begin
  ii=i+1
  yy=sin(xx*dtor*ii*0.2)
  if (i eq 0) then plot,yy,yr=[0,1.1],psym=symcat(i),/yst $
    else oplot,yy,psym=symcat(i),symsize=0.6,nsum=2
endfor

lines=indgen(n)
item='p='+string(lines,format='(i2.2)')
legend,item,psym=symcat(lines)

stop
end
;;;;;;=====
```

Can anyone help.

Maurya
