Thanks for your information. The issue is that IDL7.0 was working fine under ubuntu 9.04. I've just upgraded to ubuntu 9.10 and I have the error on bin.linux.x86 libraries.

I've tried for IDL 7.1 and it works just fine. However I do not have a license for IDL 7.1.

Is it possible to configure idl7.0 to use the bin.linux.x86\_64 folder of idl7.1? I guess it is possible since this is only related to the eclipse workbench and java and not the the idl software itself.

Giorgio
