Subject: Plot single data points in IMAP

Dear all,

I am wondering if it is possible to plot single data points in a map
set produced with IMAP.
In the help document I only found examples for overplotting IMAP with
images or vector fields with regularly gridded.

In direct graphics mode I would use "MAP_SET, ..." and then plot single
data points by "PLOTS, lons, lats, ...". In this case "lons" and "lats"
can be arbitrary coordinates from the intervals [-180; 180] and
[-90;90], respectively.
Is there any way to get a similar result with IMAP?

Thanks in advance,

Karlo
