I used the following code to display the image: image=read_tiff(file) imagesize=[62,488,290] DEVICE, DECOMPOSED = 0 LOADCT, 38 WINDOW, 0, XSIZE = imageSize[1], YSIZE = imageSize[2] TV, Image(0,*,*), 0

but there are two problems: first it's displayed upside-down and second the way it shows the image is quite different with other softwares like ENVI, it's more like the image is shown in 256-color table or something like that.
