I used the following code to display the image:

```
image=read_tiff(file)
```

```
imagesize=[62,488,290]
```

```
DEVICE, DECOMPOSED = 0
```

```
LOADCT, 38
```

```
WINDOW, 0, XSIZE = imageSize[1], YSIZE = imageSize[2]
```

```
TV, Image(0,*,*), 0
```

but there are two problems: first it's displayed upside-down and second the way it shows the image is quite different with other softwares like ENVI, it's more like the image is shown in 256-color table or something like that.
