Ask ITTVIS :-)

You can use Inkscape to import (E)PS files into SVG (it uses pstoedit [<http://www.pstoedit.net/>] to convert the PS file).

regards,
lajos

ps: I have a partial implementation for native SVG output in FL:

```
FL> set_plot, 'svg'  
FL> plot, dist(5)  
FL> device, /close_file
```
