
Subject: non-superuser installed truetype fonts in unix

Is it possible for a non-superuser to install new True Type fonts in IDL under Linux? I.e. I don't have write access to \$IDL_DIR/resources/fonts/tt so I can't edit the ttfonds.map file there. Is there a ~/.idl.... equivalent that is also read? Or can it be done via a preference that I've overlooked?

-Jeremy.
