Hi guys,
I just want to know if it's possible to put a file in a sever via ftp
using IDL. I searched and I found a lot of old posts but actually I
never found something useful. I'm on windows so I can't use SPAWN,
'ftp ....'
Also I read about the SOCKET function but I think it's no possible to
use it for this purpose. Is important to know that the ftp connection
also needs a password.
Thanks in advance for your help,
nata
