Good day Evrybody,

I'm trying to retrieve data from binary file using this idl procedure
but can't make it to run properly under idl71, any help can be
appreciated, the file is located at:

http://www1.ncdc.noaa.gov/pub/data/gpcp/gpcp-v2.1/software/read_v2.1_file.pro

and it's the procedure to get GCPC data.

Thanks again for you help.

S.S.
