
Subject: ps_start problems in idl 7.1

Posted by [Mr.G](#) on Thu, 07 Jan 2010 18:42:42 GMT

Dear All,

I was using IDL6 before and the "ps_start.pro" "ps_end.pro" worked just fine. However, after I reinstalled my linux system and idl7.1, this two programs does not seem to work properly. Does anyone has the same problem? Does anyone (hmm...David) knows how to resolve this problem?

My error message:

```
IDL> ps_start,file='test'
